## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Group I in Paper No. 5 is acknowledged. The traversal is on the ground(s) that the inventions of Group I and Group III are materially the same. This argument is found to be persuasive; therefore both Groups I and III will be examined.

Claims 13-18 and 26-50 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

### ***Drawings***

This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Color photographs and color drawings are acceptable only for examination purposes unless a petition filed under 37 CFR 1.84(a)(2) is granted permitting their use as acceptable drawings. In the event that applicant wishes to use the drawings currently on file as acceptable drawings, a petition must be filed for acceptance of the color photographs or color drawings as acceptable drawings. Any such petition must be accompanied by the appropriate fee set forth in 37 CFR 1.17(h), three sets of color drawings or color photographs, as appropriate, and an amendment to the first

Art Unit: 3738

paragraph of the brief description of the drawings section of the specification which states:

The patent or application file contains at least one drawing executed in color. Copies of this patent or patent application publication with color drawing(s) will be provided by the U.S. Patent and Trademark Office upon request and payment of the necessary fee.

Color photographs will be accepted if the conditions for accepting color drawings have been satisfied.

### ***Specification***

The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12, 23 and 52-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 52, the use of the phrases "being coated" and "being genetically transformed" makes the claims unclear. The removal of the word "being" would make the claims less indefinite.

Regarding claim 23, it is unclear what the group consists of because of the word "and" before bone marrow".

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-12, 19-22, 24-25, and 52–55 are rejected under 35 U.S.C. 102(b) as being anticipated by Pratt et al. (5,785,965). Pratt et al. discloses a prosthetic vascular ePTFE graft seeded with genetically transformed endothelial cells from the host or other sources (col. 3, lines 29-36).

Claims 1, 6, 19, 23 and 51 are rejected under 35 U.S.C. 102(b) as being anticipated by Huber et al. (Effects of Retroviral...) as cited in the Applicant's disclosure. Huber discloses a prosthetic vascular ePTFE graft seeded with transduced (genetically transformed) endothelial cells from a vein.

Please Note: The endothelial cells of the above prior art may not have been specifically transformed to express an adherence factor; however the cells do express adherence factors naturally and therefore meet the limitations. The Applicant discloses in the specification that the transformation causes an "*overexpression*" of adherence factors which the above prior art does not read upon. Also please be aware that the journal article "DANCE, a novel Secreted RGD..." cited by the Applicant in the disclosure, can be used for a 103 rejection with the above prior art if the Applicant only amends the claims to read "overexpress".

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas C. Barrett whose telephone number is (703) 308-8295. The examiner can normally be reached Tuesday-Friday between 9:00 A.M. and 6:00 P.M.
